APPLICATION

The AtmosAir 500FC ionization system is designed to be mounted in the supply air duct or air handling system of a heating, cooling or ventilation system. The unit produces bi-polar ions when airflow is delivered over the ion tubes. Power to the unit can be controlled with an optional air pressure differential switch or interlocked with HVAC fan operation, provided the power delivered to the unit does not exceed its rated voltage. Ionization intensity can be adjusted with a five-step knob on the unit. Power to the unit can be turned off at the unit or a quick disconnect at the power cord.

Optional/Available:

- Air Pressure Switch
- · Mounting Bracket
- Timer
- · Remote Monitoring Panel
- Remote Ion Switch and Indicator Light
- · Remote Indicator Light Only
